

Supplying all of your storage needs
2016

WHO IS SHIRLEY K?

The Shirley K's product line has a long history. It began with Shirley Knight who was part of a family owned business called The Fabri-Form Company.

Shirley's career began in education, and as a thermoforming manufacturer she saw an opportunity to help educators organize their classrooms and thus developed a product line of storage and organizational trays.

At this time there are over 200 products included in this line. The application of these totes and trays continues to serve the educational market and has also expanded into residential, medical, food handling, and industrial environments.

Continuing the family legacy, Shirley K's is a woman owned small business owned and operated by Shirley Knight's family.

Capabilities

Understanding space and functionality variables, Shirley K's specializes in supplying storage, food and material handling solutions for a wide variety of customers.

Goal

To produce storage and handling solutions and applications for our customers while maximizing quality and yielding cost efficiencies in today's marketplace.

Our capabilities allow customers to:

- Select from a wide range of existing size options
- Build new products for custom size options
- Add accessories to maximize functionality such as cabinet panels, table rails, labeling tags, locking lids and casters
- Purchase specific material colors, finishes and specifications including FDA and NSF listed material
- Receive quotes within 24 hours
- Drop ship

Our differentiators include:

- Heavy duty and versatile products that outlast all others on the market
- 70 years of family based thermoforming knowledge and innovation
- Wide variety and customization options
- One on one customer service and sales representative support
- Minority Ownership: Women Owned Small Business

U.S. Small Business Administration

Shirley K's products are made from a variety of plastic resins

Our returnable reusable All-Purpose Totes can dramatically cut material handling and storage costs. Shirley K's containers are light-weight, yet strong and durable enough to allow for "two-way" use. They are easy to handle, stacked when in use or nested for return or storage. Seamless, waterproof, corrosion, chemical, and wear resistant; totes with lids have locking hardware to ensure content security and casters are available for easy transport.

Divider Tote

Save a Spill

Our divider box system is a family design allowing various options to be compatible when used together. The Divider Totes are made of high density polyethylene. It provides a combination of high-impact strength and excellent chemical resistance necessary for a variety of material handling applications. For a Save a Spill, 3 dividers are provided to define sectioned compartments to secure items within the space along with a flat sheet that acts as a cover to contain splashes, spills, or contaminates.

Shirley K's Food Handling Totes & Food Prep Trays have been created specifically for the food handling and processing industries. These containers are made from natural-white, high-density, polyethylene plastic that has received FDA approval. These food handling totes feature sturdy construction and are easy to clean. Polyethylene plastic will withstand temperatures down to negative 100 degrees Fahrenheit for freezing applications and elevated temperatures up to 190 degrees Fahrenheit.
