## CAPABILITY STATEMENT

### Business Summary

Shirley K's manufactures organizational, food, and material handling totes and trays thermoformed with a variety of plastic resins. Known for guaranteeing quality, durable products serving the food handling, industrial, medical, and education industries.

Understanding space and functionality variables, Shirley K's specializes in supplying a variety of options including stock, non-stock, and custom products.

### Goal

To produce storage and handling solutions and applications for our customers while maximizing quality and yielding cost efficiencies in today's marketplace.

### Our capabilities allow customers to:

- Select from a wide range of existing size options
- Build new products for custom projects
- Add accessories to maximize functionality such a labeling tags, castors, locking lids, and imprinting
- Purchase specific material colors, finishes and specifications including NSF & FDA approved material
- Receive quotes within 24 hours
- Drop ship

### Our differentiators include:

- Heavy duty and versatile products that outlast all others on the market
- 70 years of family based thermoforming knowledge and innovation
- Wide variety and customization options
- One on one customer service and sales representative support
- Minority ownership-Women Owned Small Business
