

SAVE-A-SPILL

coolant container

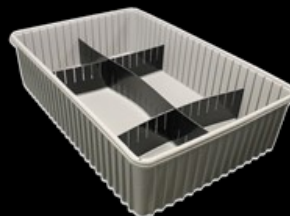

Strong lip to pull / lift.

Ribs provide structural support.

Why this container?

- ✓ *18 Gallon Capacity holds all the coolant in one container without getting too full to risk liquid sloshing over.*
- ✓ *8" Height easily fits under the truck.
33" L x 22¹/₄" W x 8" H*
- ✓ *Made of Polyethylene (HMW-HDPE) which is very tough and easily slides on concrete. Tolerates chemicals well.*
- ✓ *Save money buying direct from the manufacturer.*

Back up oil drain containment.

Use optional dividers and plastic sheet to place parts and contain the drippings.

PROCESS FOR USE

1. Drain coolant into container and cover.
2. Perform required maintenance.
3. Put tube from cooling system refiller into full container and draw coolant back into truck.
