

SHIRLEY K'S

PRODUCT CATALOG

Welcome to SHIRLEY K's

Shirley K's started out as the market leader for heavy duty plastic containers. Through the years we have developed over 100 tools for our own brand of trays and totes and their accessories. These containers have been specially designed for schools, labs, offices, industrial manufacturers, food manufacturers, pet food manufacturers, and retail establishments; all with the idea of organizing, handling, and storing various materials and supplies. Our niche in this crowded space is to provide the **most durable container**. The one that needs replaced less often because it will outlast anything else available.

With a love for problem solving and creativity, Shirley K's next developed a suite of specialty proprietary products with the goal of containing messes with plastic shapes. You can see those in our **"Proprietary Products"** category. We are very proud of the tidy environments that they provide.

Shirley K's also provides custom heavy gauge thermoforming for OEM manufacturers. We make the plastic parts that manufacturers use to assemble their products such as covers, enclosures, shrouds, bezels, guards and other components. We also produce the reusable packaging for them to efficiently have their other components shipped. Our focus in this area is our **service**. Our customers love us and stay with us because they know they will get their parts **on time, every time**. For them to make their product, they have to have ours and they know they can count on Shirley K's.

CAPABILITIES AVAILABLE

- Short run specialty equipment for competitively priced lower volumes
- Stock and inventory programs with next day shipments
- Drop ship programs
- Long run rotary equipment for larger volumes
- Dozens of stock items with no minimum buy and available for next day shipment
- 5-axis CNC trimming
- Assembly

5 PRODUCT SEGMENTS INTRODUCED

- **Organizational trays**
- **Food handling totes and trays**
- **Material handling totes**
- **Custom thermoforming**
- **Proprietary products**

ORGANIZATIONAL TRAYS

Shirley K's is a leading national supplier of plastic storage trays. The highly durable and functional design makes these trays ideal for a variety of uses. A wide variety of size and style alternatives as well as accessories allow you to create an organization system perfectly suited for any situation. The glossy material is available in a wide variety of colors making this system as attractive as it is functional. Made of non-porous material that's easy to clean and sanitize.

STORAGE TRAYS

After first pioneering this type of product for school classrooms in 1962 with 12 sizes, we have grown the category to over 100 sizes to choose from and have helped a variety of other applications such as science labs, offices, industrial manufacturing and retail stores to better organize their storage. Ribbed side panels can be attached to the inside of cabinet walls to create slide out trays for a cabinet system, or the trays can be simply placed on shelves, in cubbies or mounted to underside of desks or counter tops.

- **Attractive high gloss finish**
- **Made of 100% recyclable high impact polystyrene**
- **Easy to clean and chemical resistant**
- **Lightweight and easy to handle**
- **Unbreakable in normal use**
- **Steel label card holder**

ORGANIZATIONAL TRAYS

ORGANIZATIONAL TRAY ACCESSORIES

Our panel or rail systems make installing your organizational trays a breeze. Add these to existing furniture units or tables for the perfect space saving solution.

PANELS

Our ribbed support panels can be installed on the inside walls of new or existing storage cabinets for the convenience of multiple slide-out trays in one unit. These panels can be attached with screws, staples or strong glue.

PANELS

Part Number	Height	Depth	Rib Gap	Spacing
P1028	27.0"	21.25"	0.614"	1.0"
P1029	29.75"	21.125"	1.096"	1.5"
P1206	29.688"	18.75"	1.096"	1.5"

RAILS

Our aluminum rails are the perfect solution for quick access to items. They can be installed under project tables, in the house or classrooms, and in the office. They are perfect for pantries, workbenches, shelves, desks and anywhere that convenient tote access or storage is needed.

RAILS

Part Number	Length
R15	15"

LIDS

There are two lids available that are compatible with two tray sizes each. These lids hang over the top edges of the tray and snap onto the tray lip for a secure fit.

LIDS

Part Number	Width	Length	Height	Fits
T135L	10.2"	13.0"	0.5"	T135 and T133/ T133-4
PT186L	9.5"	9.25"	1.0"	PT186 and T157

MISCELLANEOUS TRAYS

COMPARTMENT TRAYS

Two styles of compartment trays are available to maximize the organization of small items. Fixed compartments for when the number of items that need sorted are consistent and removable dividers for when the number of compartments need to change from time to time.

CADDIES

Made from impact resistant plastic, this organizer has two compartments and a very strong handle for grab and go usage. Easy to clean and dishwasher safe.

CASH BOX LINER

This tray is made to fit inside lockable cash boxes used in team concession stands. The seven compartments are sized to conveniently sort change and cash.

SPICE RACK

Designed to lay in a drawer, this organizer holds 4 rows of standard ½ oz - 2 oz spice jars and presents them to easily to find what you are looking for.

SPECIALTY

A few Specialty trays have been developed for a variety of uses.

FOOD HANDLING

All of Shirley K's thermoformed products are made out of a high molecular weight version of HDPE plastic making them the most durable containers on the market. All food handling products are made with FDA approved virgin material. They are excellent for frozen applications, extremely break/crack resistant, temperature tolerant from 180°F to -120°F and easy to clean. All items are available in a custom thicker gauge for even greater durability.

FOOD TRAYS AND TOTES

A variety of food handling containers are available in multiple sizes.

MATERIAL HANDLING

Shirley K's material handling products are all made of high molecular weight HDPE plastic. Superior in strength, impact resistance, chemical resistance and durability compared to injection molded versions of the same type of products. Our many happy customers choose Shirley K's thermoformed containers because of the variety to pick from, the quality, and the long life of the products.

SHIPPING TOTES

Returnable and reusable, these shipping totes can dramatically cut material-handling costs. They are lightweight, yet strong and durable enough to allow for "two-way" use over prolonged periods of time. They are easy-to-handle, stack when lidded, and they nest well for return or storage. The totes are waterproof, corrosion resistant, chemical resistant, wear resistant, and available with optional locking clasps to ensure content security. Optional casters make them easy to move around even when filled with heavy material.

GENERAL PURPOSE TOTES

Shirley K's general purpose totes are ideal for a broad range of shipping and storage needs. With a large selection of sizes and dimensions available, the applications for these totes range from basic manual product movement operations to usage in fully automated WIP systems. Tapered sidewalls allow 50 to 90% nesting when empty to conserve storage space.

MATERIAL HANDLING

STACKING TOTES

Versatile, economical and durable, these totes combine the advantage of secure, stable stacking and the space economy of nesting while empty. Choose from 3 styles – go from nesting to stacking by orienting the tote 180 degrees, by orienting the tote by 90 degrees (cross stacking), or by flipping up wire bails.

DIVIDER BOXES

Divider boxes are heavy-duty containers that can be subdivided into compartments by using length and width dividers. They are ideal for use in industrial, commercial, electronics, and healthcare markets for storage assembly, fabrication and distribution applications. Available in 11 sizes, 4 of which have available covers.

CUSTOM THERMOFORMING

Shirley K's provides world class service to many customers that own their own tooling.

Shirley K's also provides custom heavy gauge thermoforming for OEM manufacturers. We make the plastic parts that manufacturers use to assemble their products such as covers, enclosures, shrouds, bezels, guards and other components. We also produce the reusable packaging for them to efficiently have their other components shipped. Our focus in this area is our **service**. Our customers love us and stay with us because they know they will get their parts **on time, every time**. For them to make their product, they have to have ours, and they know they can count on Shirley K's.

Capabilities available

- Short run specialty equipment for competitively priced lower volumes
- Stock and inventory programs with next day shipments
- Drop ship programs
- Long run rotary equipment for larger volumes
- Dozens of stock items with no minimum buy and available for next day shipment
- 5-axis CNC trimming
- Assembly

These custom programs can develop in several ways:

1

Move a current tool to Shirley K's to enjoy more reliable delivery or to save money.

2

Send us a tool design and we can build you a new tool.

3

Send us a part design and we can design and build a new tool.

4

Send us a current part and we can reverse engineer it to design and build you a new tool.

In all cases we can help with material selection to optimize for the priority characteristics of the part. We can develop small volume 3D printed tools or larger volume aluminum tools. We have CNC trimming to finish the part with reliable and repeatable quality.

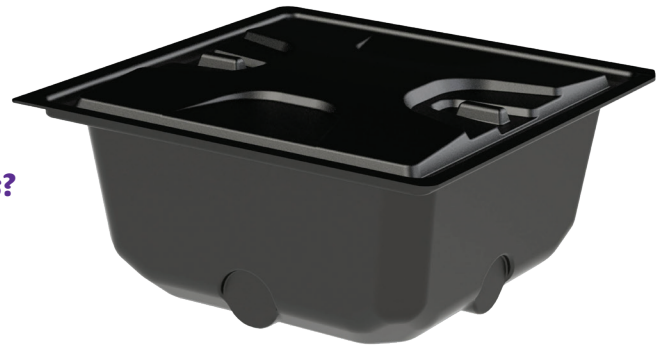

We can competitively run any volume.

High volume parts - productive rotary machines

Low volume parts - quick change-over shuttle machines

What does world class service look like at Shirley K's?

- On time, every time order fulfillment
- Emergency short run specialty equipment
- Finished goods inventory programs
- Same day responsiveness

Our low overhead enables us to provide competitive pricing, but **it's the service level that allow us to say that we've never lost a customer.** Contact us today.

PROPRIETARY PRODUCTS

Shirley K's has developed a range of unique protective solutions with shaped plastic products. The primary theme is to contain and protect your space from fluids, from muddy boots, from pet messes, from play sand and so forth. If you have a mess that needs contained, we probably have a solution for it.

Sensory Table

Our sensory table tubs are made of sturdy plastic and have a strong perimeter lip to support > 100lbs. Just drop them in a wood or metal table frame to complete a sensory table. These sensory tables are ideal for both classroom and home environments. The smooth surface is easy to clean and sanitize. A hole in the bottom with drain plug makes emptying very easy.

SENSORY TABLE

Part Number	Width	Length	Depth	Drain
P1076	17.875"	43.0"	5.5"	1" drain hole toward one end
P1108	18.0"	42.5"	5.5"	1.25" drain hole in center
P1205	18.0"	42.5"	5.5"	1.125" drain hole in center

Welping Box

A safe place for privacy and nesting for your pregnant dog to give birth. Designed for small to medium sized breeds. The low front entry can be stepped over by the mother while keeping small pups contained.

Features

- **SIMPLE** - no assembly - pull out of the shipping box and use
- **SANITARY** - FDA approved material easy to wipe clean and sanitize.
- **DURABLE** - thick, rigid plastic ABS material is crack/break resistant
- Available in Gray or beige

Size: 30" x 30" top outside / 25" x 25" bottom inside

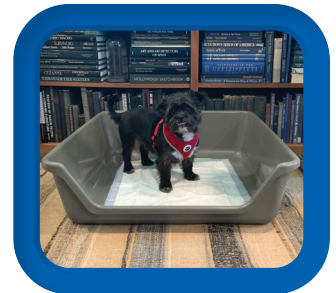

Puppy Potty

This over-sized indoor potty allows medium-sized dogs to make their circles before going, and the 9" tall side walls contain messes from leg hikers. No problem if the edge of the pad is the usual target because everything is inside the potty.

Features

- Finally! A litter box actually large enough for dogs. 25" x 25"
- Perfect solution for: Puppy housebreaking, Urban apartment living, Owner away Long days, Poor weather outside, Owner mobility issues, Dogs with bladder issues, Dog recovery from injury/illness
- The smooth non-porous plastic is easy to clean and sanitize and does not absorb odors. Heavy gauge HDPE material is crack/break resistant
- Available in Gray or tan

Size: 30" x 30" top outside / 25" x 25" bottom inside

Senior Cat Litter Box

The largest litter box you can find. Also has a low enough entry point so that aging cats can easily get in and out. Room to move around without touching sides and large enough for multiple cats yet lightweight for its size (only 5 lbs).

Features

- Perfect solution for: Arthritic aging cats, Especially large cats, Diabetic/ kidney disease, Other debilitating illnesses, Multiple cats to share, Small / short legged, Kittens.
- Sanitary - 9" side walls to prevent litter scatter; Smooth non-porous plastic is easy to clean and sanitize; Does not absorb odors; Seamless and rounded –no tight corners.
- Extreme Durability - Heavy-gauge HDPE material resists cracking and breaking; Tolerant to waste and chemicals.
- Available in Gray or tan

Size: 30" x 30" top outside / 25" x 25" bottom inside

PROPRIETARY PRODUCTS

Drip Trays / Boot Trays

Shirley K's versatile boot/drip trays are used in the base of lockers and furniture units to catch drips from wet footwear, umbrellas, and chemical spills. Other uses include classrooms, yoga studios, garages, foyers, mudrooms, refrigerators, and vehicles.

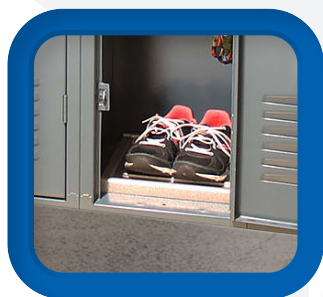

Our Drip Trays / Boot Trays come in a variety of sizes to meet your custom needs. These trays are designed for catching spills, whether it's in a locker, at your front door, in the trunk of your vehicle, in your refrigerator, in your garden, or in your pet's feeding area.

Our unique design has a low profile, and features areas to hold excess liquid and peaks to keep your items clean and dry. These trays are made from High Impact Polystyrene (HIPS), a very durable material.

The trays are light weight and easily washable. We can manufacture the trays in your preferred color as well.

Features

- Drip Trays come in nine **widths** of 10", 12", 13", 15", 16", 18", 19" and 21"
- You can have any **length** between 2" and 44"
- All trays are 1" in **height**

Save-A-Spill

Shirley K's Save-A-Spill containers are specifically designed to collect and contain automotive fluids, such as coolant, oil and transmission fluids. Made from chemically resistant High Density Polyethylene to withstand the abusive shop environment, the Save-A-Spill containers are the ideal tool for the job.

Features

- Up to 18 gallon capacity
- Condensed profile easily fits under most trucks
- Flat sheet top and divider baffle inserts available
- Reinforced ribbing for superior structural strength
- Easy-grab, strong lip
- Notched corners to hold drain tubes
