

# SAVE-A-SPILL

Shirley K's Save-A-Spill containers are specifically designed to collect and contain automotive fluids, such as coolant, oil and transmission fluids. Made from chemically resistant High Density Polyethylene to withstand the abusive shop environment, the Save-A-Spill containers are the ideal tool for the job.

- ▶ 18-GALLON CAPACITY
- ▶ EASY-GRAB, STRONG LIP
- ▶ HEIGHT OF ONLY 8" EASILY FITS UNDER TRUCKS
- ▶ REINFORCED RIBBING FOR SUPERIOR STRUCTURAL STRENGTH
- ▶ TOP SHEET & DIVIDER BAFFLE INSERTS HELP TO SEPARATE DEBRIS FROM FLUID
- ▶ NOTCHED CORNERS TO HOLD DRAIN TUBES

## Trouble Free Design

The notched corner holds the tube down into the fluid while vacuum draws it back into truck. No more trouble with the tube curling out of the fluid during the process.

# THE IDEAL ENGINE COOLANT DRAIN CONTAINER

## Drain Onto Cover

Run drain tube from radiator drain cock to container cover. The fluid runs to corners and down into the container. Any solids/debris will remain on cover to be discarded.

## Make Truck Repairs

Fluid remains under protective cover while truck repairs are made. There is an optional lid for extra protection for long duration repairs.

## Replace Fluid

Insert tube into corner and down into fluid. Use Vacuum tool to draw fluid back into truck.

**BUY DIRECT FROM MANUFACTURER - \$66  
(CONTAINER WITHOUT COVER AND DIVIDERS \$40)**
